

Unity Meeting Brief

1. Date and Time

- Sunday the 1st of September 2024

2. Attendee

- Nyuysemo Carlglain (FET)
- Jong Turkson (FET)
- Padaran Ambe (FET)
- Tifuh Percilia (FET)
- Ayuk Deland (COT)

3. Agenda

- Introduction by team leader on the purpose of the team
- Introduction by team members
- Ideas from team members
- Voting the first team project

4. Key Discussion Points

Purpose

The purpose of Unity-web (Unity) is to which is to build a strong and united team to tackle problems faced by the community, participate in Hackathons and finally take up free lancing jobs.

Project Ideas by team members

Percilia (Front end developer and designer)

- Build an Internship finder site

Turkson (Front end developer and designer)

- Budget tracking site
- Task management site

Ambe (Backend developer)

Deland (Network analyst, frontend developer)

- Registration system for public exams
- Build the **UNITY** website that will advertise the services we offer (free lancing, tutoring)

First project

After a simple voting exercise, the team decided to build a website that was proposed by Turkson which is the **Budget Tracking site**.

5. Action Items

We are all supposed to **ideate and choose the features of this software** and do the **front-end design and the necessary UML diagrams possibly before next week Wednesday 11 September 2024**

6. Next Steps

- After the design of both the backend and the front end have been done and the srs documents made, work will be share and the coding phase will kick-off.
- Before coding begins we will have a brief presentation on git and github to ease how the team will work and push their code. We will also decide on the naming standards of files and folders if possible classes.

7. Technologies

- MERN stack
- GitHub

8. Closing Remarks

- We will generate money from Freelancing and Hackathons. We will also create a YouTube channel if we discuss and see that we can have content.
